## Features

- Constructed from sanded stainless steel for hygienic use.
- Built-in printer.
- Seal date, expiry date, lot number and operator code printable.
- Adjustable font width.
- Printer can be activated & deactivated.
- Globally understandable coding. No need for language feature.
- Batch counter.
- Clock and calendar feature.

Pouchmate™ medical sealing device for hospital and industry applications is a combined self-cutting and sealing system that is contributing to our productivity and flexibility independence by providing an unparalleled blend of benefits.

*PMS Steri-Seal™ machines are validated, calibrated and in compliance with international standards*

## Features

- Automatic Pouch Maker.
- Large LCD screen.
- Easy settings via switch membrane panel.
- Maximum seal width 400mm.
- Multiple reel loading feature.
- Produces 4.000 pouches per hour.
- Pouch length can be adjusted from 50mm up to 1000mm.
- Batch counter.
- Sealing time can be adjusted.
- Can be used also for only reel cutting.
- Adjustable seal pressure.

# Transfer Roller | SM1110 - SM1120 - SM1130

A close-up photograph of a transfer roller assembly. It features a series of parallel, brown, cylindrical rollers mounted on a metal frame. A ruler is visible at the bottom of the frame, showing measurements in inches and centimeters. The rollers are arranged in a row, and the background is slightly blurred.

Heavy instruments to be packed before sterilization can cause poor seals during the sealing process. The pack weight and its resistance combined with weak seal strength can lead contamination and/or pouch bursting during sterilization under vacuum conditions.

Transfer roller is a helpful accessory for any sealing machine and provides the user safe handling with heavy packs and high volume packaging operations.

*Transfer roller is an accessory for sealing machines, must be ordered separately.*

## Features

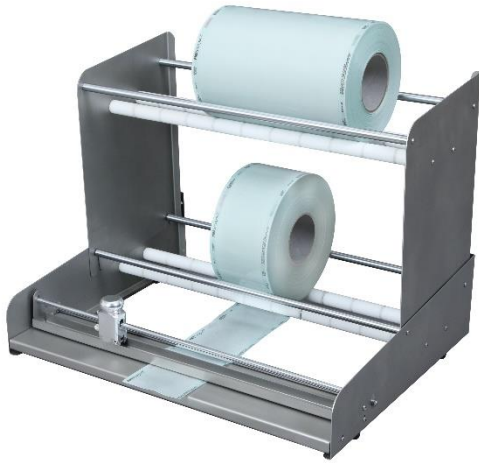

- Solid, durable.
- Easy to mount.
- Free moving rollers.
- Different sizes available.
- Transfer roller is an accessory for sealing machines, must be ordered separately.

# Roll Dispenser with Cutter | KA201

The roll dispenser & cutter is a useful addition to **PMSSteri-Seal®** rotary sealing machines. Its renewed and the modular design makes it an ergonomic and economic tool which can be used on working stations or just mounted on the wall.

*The dispenser frame is constructed from stainless steel and steel rods with nylon bearings for hygienic use at CSSDs.*
